

***ATTENTION ***

**A disruption in your water service is scheduled on
Wednesday, September 2nd from 1:00-5:00 AM**

This letter is to inform you of a brief water service outage related to the La Grange Water Treatment Plant tank replacement project. While this disruption was not originally expected, construction progress has shown that a short outage in water service is, in fact, necessary.

In an effort to limit the inconvenience to our customers, the water service outage has been scheduled to begin at 1:00 a.m. and last until 5:00 a.m., on Wednesday, September 2, 2020. Crews will work through the early morning when demand is the lowest, to complete the work and have water back in service as quickly as possible. The water service outage will not result in any degradation of the drinking water and all appropriate testing and inspection will occur before, during, and after the water outage to ensure compliance with relevant drinking water standards.

During the water service outage timeframe, we ask that you turn off outside sprinklers, and do not use faucets or showers, run the washing machine or flush toilets. Your cooperation will help to ensure that the work is completed in the most efficient manner possible and normal service is restored quickly.

We appreciate your understanding and patience throughout the tank replacement project. It is an important investment in your community and we are looking forward to its completion.

If you have any questions regarding the project please visit TID.org/LGWaterTreatmentPlant or call 209-883-8661.
